

How to participate to H2020 What changes from FP7

Morten Møller Head of Programme Coordination Unit DG CONNECT European Commission

1. A SINGLE SET OF RULES: the overarching principle

SINGLE SET OF RULES for Horizon 2020

- Covering all research programmes and funding bodies (art.185 initiatives, art. 187 initiatives, CIP, EIT)...
 - ...but flexible to accommodate specificities where needed.
- In accordance with the new Financial Regulation and its Rules of Application.
- Coherent with the rules of the other EU programmes.
- Also applicable to Euratom.

2. A SINGLE FUNDING RATE (Art. 22)

 \checkmark

(*) Research and technological development includes scientific coordination.

(**) For *beneficiaries* that are *non-profit public bodies*, secondary and higher education establishments, *research organisations* and *SMEs*

(***) The reimbursement of indirect eligible costs, in the case of coordination and support actions, may reach a maximum 7% of the direct eligible costs, excluding the direct eligible costs for subcontracting and the costs of resources made available by third parties which are not used on the premises of the *beneficiary*. (****) Including research for the benefit of specific groups (in particular SMEs)

One project = One

- Same rate for all beneficiaries and all activities in the grant.
- ✓ The applicable rate will be defined in the Work Programme:
 - Up to 100 % of the eligible costs;
 - but limited to a maximum of 70 % for projects "close to market". 100 for non-profit organisations!

- Grant Agreements as the main funding stream (also possibility of Grant Decisions).
- Reimbursement of costs as the main funding method.

- Specific provisions for new forms of funding targeting innovation: precommercial procurement, procurement of innovative solutions and inducement prizes.
- Financial instruments: a debt financial instrument, a financial instrument providing equity finance for R&I, etc.
- Possibility of output-based grants (lump-sums per project).
- Enhanced use of other lump-sums, flat rates and scales of unit.
- Electronic signature of Grant Agreements (and expert contracts)

4. COST REIMBURSEMENT

PERSONNEL COST

Wider acceptance of average personnel costs (now under scale of unit costs, Art. 27)

Minimizing in Horizon 2020 the basic conditions for acceptance of average personnel cost accounting practices (including cost-centre approaches). Acceptance of supplementary payments (bonus+) with 8000 Euro-cap/annum

- Simplifying participation for SMEs (Art. 26) Providing in the Rules for a scale of unit system for SME owners and physical persons without a salary. Less requirements for time records (Art. 25)
- No time records for researchers working exclusively in the project.
- ...and more in the Horizon 2020 Grant Agreement \checkmark

The Grant Agreement will add further elements of simplification regarding personnel costs like simplified provisions on productive hours and clear minimum rules on time-recording.

INDIRECT COSTS

Unique method: 25 % flat-rate (Art. 24) \checkmark

Aiming at simplifying the financial rules and reducing the recurrent errors in the calculation of the indirect costs, frequently leading to liquidated damages and extrapolation.

5. CONTROLS AND AUDITS

| Financial viability | Most beneficiaries exempt from detailed analysis; only systematic |
|----------------------------|--|
| Audit certificates | check for coordinators when requested EU funding for the project is ≥ 500 k€ Only for final payments when total EU contribution claimed by the beneficiary on the basis of actual costs ≥ 325.000 € Optional Certificates on average personnel costs (now under scale of unit costs) |
| | Optional Certificates on average personnel costs (now under scale of unit costs) |
| Ex-post audits | Attention: The provisions are in Horizon 2020 Regulation ! |
| | Audit strategy focused on risk and fraud prevention |
| | Attention: The provisions are in Horizon 2020 Regulation ! Audit strategy focused on risk and fraud prevention In the path to a single representative sample |
| Extrapolation | New Financial Regulation will apply |
| Guarantee Fund | Continuity of the system under procedures similar to those applied in FP7 |

As a general rule, the legal entities established in third countries and international organisations may participate.

In certain cases, the work programme may introduce restrictions to the participation of legal entities established in third countries:

Where conditions for the participation of legal entities from Member States in the third country's programmes are prejudicial for the Union's interest;

For security results.

Can entities from third countries get EU funding? Yes IF:

- The third country is identified in the Work Programme;
- Or, the Commission deems essential the participation of the entity in the action;

- Or, the funding is provided for under a bilateral scientific and technological agreement.

7. INTELLECTUAL PROPERTY RIGHTS

The rules on IPR, exploitation and dissemination of results are built on the basis of proven FP7 provisions with an appropriate balance between legal security and flexibility. Basic orientations regarding:

- Ownership for the participant that generates the result, only joint-ownership where jointly generated (default joint ownership regime maintained).
- * **Protection** where appropriate.
- Exploitation: best efforts obligation; in specific cases the work programme/grant agreement can foresee specific exploitation obligations in the European strategic interest.
- Transfer and exclusive licences outside the Union/Associated Countries: right to object is maintained in case a participant has received Union funding; prior notification to be inserted in grant agreement where appropriate.
- Dissemination: principle maintained; new emphasis on open access to research publications and experiments with open access to other results.

⇒ Access rights:

European Commission

- Participants in the same action for implementation and for exploitation purposes (also for affiliated entities established in MS/AC).
- Union for non-commercial, policy related purposes (broader and also for MS in certain security research actions).

⇒ Specific cases:

Tailor-made provisions to be set out in the grant agreement: securityrelated activities, ERC frontier research, SME instrument, mobility, support, KICs, etc.

⇒New forms of funding:

Flexible provisions for pre-commercial procurement, procurement of innovative solutions and prizes.

Who can participate

- Any undertaking, university or research centre or other legal entity, whether established in a Member State (MS) or Associated Country (AC)* or third country
- JRC (Joint Research Centre) is deemed to be established in another MS or AC
- <u>International organisations</u> and participants from <u>third countries</u> can participate only if in addition to minimum consortium requirement

*presently: Albania, Bosnia-Herzegovina, Croatia, FYR Macedonia, Iceland, Israel, Liechtenstein, Montenegro, Norway, Serbia, Switzerland, Turkey. List given in Guide for applicants

- Three independent legal entities from three different Member States or Associated countries
- EEIGs composed of members that meet the criteria above
- Support actions; no restrictions

Who can get funding

- Legal entities from MS and AC or created under Community law (and the JRC)
- International European interest organisations
- Legal entities established in international cooperation partner countries (ICPC-INCO)

and

- International organisations
- Legal entities established in 3rd countries other than ICPC-INCO only exceptionally if provided for in SP or WP or essential for carrying out action; or if provision for funding is provided for in a bilateral agreement between Community and that country

Grants for Research and Innovation – 100% funding of all activities and participants Grants for Innovation – 70% funding of all activities and participants –except non-profit (100%) Support and Coordination Actions **Programme Co-funding Actions SME-Instrument** – Instrument to support specific SME activities in three phases **Pre-Commercial Procurement (PCP)** – Steer development to public sector needs **Public Procurement of Innovative Solutions** (**PPI**) – First byer for innovative solutions **Prizes** – Support for two key categories of prizes (recognition and inducement) 13

Funding of all activities and participants: 100% Defined in Work programme. Min 3 participants. Main activity type: Research and Development Activities: All activities can be covered Can support the whole project range from large Integrated Projects to small Targeted Research Projects

Would cover the following project types from FP7:

- Integrated projects (IP) Grant for objective driven research
- Focused projects (STREP) Grant for specific focused research

Funding of all activities and participants: 70% (except non-profit organisations:100%)

- Defined in Work Programme. Minimum 3 participants.
- *Main activity type: Innovation activities activities close to the market*
- Activities: All activities can be covered
- *Can support the whole project range from large Integrated Projects to small Targeted Research Projects with a focus on innovation*

Would cover the following project types from **FP7**:

- Integrated projects (IP) for take up actions
- Focused projects (STIPs) Grant for specific focused innovation projects

Funding of all activities and participants: 100% Defined in Work Programme. Min. 1 Participant. Main activity type: Support and coordination activities Activities: Accompanying measure activities, studies, networking etc.

Would cover the following project types from **FP7**:

• Support Actions

- Coordination Actions
- Networks of Excellence If so wished

Funding of all activities and participants: 70% ? – under discussion Defined in Work Programme. Main activity type: Grant for supplementing calls or programmes funded by non-Union entities managing R&I programmes.

Would cover the following project types from **FP7**:

- ERANET PLUS
- 185 activities like AAL
- NB! ERANETS to be discontinued

SME instrument

PCP and PPI

- <u>PCP</u> to steer the development of solutions towards concrete public sector needs, whilst comparing/validating alternative solution approaches from various vendors
- <u>PPI</u> to act as launching customer / early adopter / first buyer of innovative commercial end-solutions newly arriving on the market

Two key categories of prizes:

- o key categories of prizes: Recognition prizes (Nobel Prize, DG INFSO's "ICT Prize", ...)
- Inducement Prizes (Ortieg Prize, Ansari X-Prize, ...)

First ideas for Inducement prizes for ICT/IST H2020:

| | 'Grand' Prize (~€10m per prize) | ~50% of overall prize budget ~8 launched in H2020 Min. 4 years duration Addressing breakthrough impacting >1 H2020 challenge |
|--|---|--|
| | 'Major' Prize (€3-6m per prize) | ~35% of overall prize budget ~10-15 launched in H2020 Typically 2-4 years duration Addressing breakthrough at challenge level |
| | 'Sectoral' Prize (€500k -€2m per prize) | ~15% of overall prize budget ~20-25 launched in H2020 Typically 1-2 years duration Addressing breakthrough at objective level |

Possible Spread of instruments in H2020

□ In <u>Societal Challenges</u>

Research and development Grants; Innovation Grants;
 Support Actions, Programme co-funding; PPI; PCP; Prizes;
 More emphasis on Innovation/close to market activities.

In <u>Leadership in Enabling and Industrial</u> <u>Technologies</u>

- Research and development Grants, Innovation Grants, Support Actions; PCP, Prizes
- Support to KET: including pilot lines, prototypes, first-inkind equipment and facilities and demonstrator activities (High level group report on KET). 50-50 R&D and I.

□ In Excellence

 Research and development Grants; Prizes; Marie Curie Grants, European Research Council (ERC) Grants. More emphasis on research activities.

Thank you for your attention!
